

Leyi Zhu

leyi@nyu.edu

EXPERIENCE

Google

June 2026 – Present

Software Engineer, YouTube Shorts Feed Optimization

- Work on learned ranking functions for the YouTube Shorts recommendation feed.

Tencent America, Pixel Lab

June 2022 – Aug. 2022

Graphics Research Intern

- Developed a method for mesh connectivity optimization under user-defined distortion constraints, with tools to transfer geometric data across mesh connectivities.
- Improved accuracy and convergence of common geometric distortion energies (e.g., AMIPS, Symmetric Dirichlet) via adaptive-precision arithmetic.

EDUCATION

New York University

Sept. 2019 – Feb. 2026

Ph.D. in Computer Science, specializing in Computer Graphics

Courant Institute of Mathematical Sciences

Thesis: *Surface Parameterization and Remeshing with Guarantees*

University of Science and Technology of China (USTC)

Sept. 2015 – July 2019

B.S. in Information & Computational Science

Ranking: 1/46

Special Class for the Gifted Young

SELECTED PUBLICATIONS

BijjectiveRemesh: Maintaining Bijjective Mappings for Data Transfer Across Remeshed Manifolds, L. Zhu, M. Tao, Y. Hu, D. Panozzo, D. Zorin, *arXiv preprint*, 2026

Which Cross Fields can be Quadrangulated? Global Parameterization from Prescribed Holonomy Signatures, H. Shen, L. Zhu, R. Capouellez, D. Panozzo, M. Campen, D. Zorin, *ACM Trans. Graph. (SIGGRAPH)*, 2022

Efficient and Robust Discrete Conformal Equivalence with Boundary, M. Campen, R. Capouellez, H. Shen, L. Zhu, D. Panozzo, D. Zorin, *ACM Trans. Graph. (SIGGRAPH Asia)*, 2021

Simulation and Visualization of Ductile Fracture with the Material Point Method, S. Wang, M. Ding, T. Gast, L. Zhu, S. Gagniere, C. Jiang, J. Teran, *ACM SIGGRAPH/Eurographics SCA*, 2019 (Best Paper Award)

HONORS

MacCracken Fellowship, New York University

2019 – 2025

National Scholarship, USTC

2016, 2018

Huawei Scholarship, USTC

2017

SKILLS

Programming Languages

C/C++, Python, MATLAB, Shell

Machine Learning

Learning-to-Rank, Recommender Systems, Distributed Training

Software & Tools

PyTorch, Mathematica, Blender, ParaView, L^AT_EX
